WHY TEAMS PICK SAVIN GROUP

More system, more value

You don't just get more pages — you get automation, SEO and analytics wired in. Competitors charge for each separately.

Free extras on every plan

Logo, WhatsApp, analytics, SSL — included. Agencies routinely bill ¹5–15K extra for the same things.

SEO built in, not bolted on

Technical SEO foundations come with every plan. Agencies charge ¹8K+ for this as a separate line item.

Enterprise-grade security

Free SSL, DDoS protection, malware scanning and automated backups — your data is protected from day one.

Requirement-based pricing

No rigid packages. We scope exactly what your business needs — nothing more, nothing less. You pay for outcomes.

Blazing-fast builds

CDN, image optimisation and caching ship by default — pages load under 1.5s while competitors crawl past 3s.

Mobile-first by design

70%+ of your buyers are on a phone. Every build is engineered thumb-first, not shrunk down from desktop.

Honest, human support

Talk to the engineer who built your system. 6–24 hr response — and we stay with you long after launch.

Why choose Savin Group?

A complete revenue system from Rs 25,000 — versus competitors' 3–5 static pages at Rs 25,000+.

And everything is requirement-based, so you only ever pay for what your business actually needs.
